

PLATINUM SPONSOR

GOLD SPONSORS

SILVER SPONSORS

PLATINUM SPONSOR AND EXHIBITOR

DR DAS LTD

www.dr-das.com

DR DAS LTD offers environmental information products, scalable from a single analyzer to national networks. Our products include Envidas Ultimate data loggers and the Envista ARM central data collection and reporting software. We offer public information tools such as web sites, phone Apps, displays, kiosks and telephony.

GOLD SPONSORS AND EXHIBITORS

Agilaire LLC

www.agilaire.com

Agilaire provides air monitoring data acquisition and management systems for over 80 state and local agencies and 12 tribes in the US. It's flagship products, AirVision and the 8832/872 data loggers form a complete solution for collecting data from field sensors, providing quality assurance, and meeting needs for both internal reporting and publishing information to USEPA and the public. Public information options include "plug and play" AgileWeb site, and the MyAQI mobile app.

American Ecotech

www.americanecotech.com

American Ecotech specializes in supplying state of the art instruments measuring specific gases, aerosols, and particulate airborne matter, including gas analyzers to measure NO_x, CO, SO₂, CO₂, NH₃, H₂S, NO_y, and/or ozone. Our division Ambilabs is a full services provider and integrator of air, environmental, and process monitoring solutions.

SILVER SPONSORS AND EXHIBITORS

Air Resource Specialists, Inc.

www.air-resource.com

Air Resource Specialists, Inc. (ARS) provides professional consulting and support services in air quality monitoring, modeling, and environmental compliance. Formed in 1981, ARS has successfully conducted a variety of contracts for federal, state, and local agencies, Indian nations, and industrial clients.

Craig Environmental Consulting

Craig Environmental Consulting has been helping Tribal Air Monitoring programs since 2006 and has been in the air monitoring field for almost 40 years. Please stop by our table so we can discuss your air monitoring program. I am always interested in hearing about air monitoring programs.

GrayWolf Sensing Solutions

<https://graywolfsensing.com/>

GrayWolf manufactures advanced environmental instrumentation for indoor air quality (IAQ) measurement, toxic gas monitoring, heating, ventilating & air conditioning (HVAC) testing and other applications. GrayWolf offers a broad range of highly accurate, fast response sensors (for CO₂, VOCs, differential pressure, airflow, particulate, formaldehyde, ozone, ammonia, CO, H₂S, NO, NO₂, SO₂, Cl₂ and more). Embedded computers in the GrayWolf meters, running user-friendly WolfSense™ software, enable highly efficient documentation and reporting for walk-thru surveys and for long-term trending/logging. Extensive on-board educational information is available, accessed via the color touch screen (help videos, government & industry guidelines, sensor technical data, etc.).

Met One Instruments, Inc

www.metone.com

Met One Instruments; We Care about Air! We are a dynamic, experienced company providing solutions for ambient, indoor and controlled environmental monitoring. Met One specializes in providing affordable, precision, and highly reliable particulate and mass monitors for ambient and indoor air quality, controlled environments.

Legal Counsel to Tribal Governments and Businesses

Procopio LLP

www.procopio.com

Procopio provides legal counsel to Tribal governments and businesses. Procopio has represented Tribal governments and worked with their environmental protection divisions for over 20 years, assisting with regulatory compliance, project permitting, ordinance development, project planning and program development. Our experience with tribal water, air quality, endangered species, land planning, clean energy, and property cleanup matters is designed to assist tribal communities prepare for a sustainable future.

Teledyne API

www.teledyne-api.com

Teledyne API (TAPI) is a global leader in the design and manufacture of precision air quality and industrial gas monitoring instrumentation located in San Diego, California, USA. Our instruments are used worldwide in ambient air quality monitoring systems (AQMS), continuous emissions monitoring systems (CEMS), and industrial process applications. Our instruments comply with U.S. Environmental Protection Agency (EPA), European Union (EU), and other global regulatory agencies for the measurement of criteria pollutants including NO₂, SO₂, CO, O₃, PM₁₀ & PM_{2.5}. We also provide a variety of complementary gas measurements including NH₃, H₂S, TRS, TS, CO₂, O₂, as well as precision Zero Air Generators and Calibrator instruments for both standard and trace-level applications.

EXHIBITORS

AARST Foundation

www.aarstfoundation.org

Presenting information regarding the health risk of living with elevated radon levels. Radon is the leading cause of lung cancer in nonsmokers.

Adomani, Inc

www.adomanielectric.com

ADOMANI offers electric vehicles and charging support. Conversion of current fossil fueled vehicles to plug-in electric is also available.

Apple Environmental

www.appleenvironmental.com

Education for meth remediation training.

Blue Tomorrow

www.blue-tomorrow.com

Blue Tomorrow builds and deploys low-cost air quality monitors that collect continuous data on important air quality parameters. The monitors are also equipped with the ability to send the collected data in real-time to websites so the information can be accessed remotely. Blue Tomorrow air quality monitoring solutions can be used for fence line monitoring or to inform community members when air quality reaches levels of concern.

Cal-Bay Controls

www.calbaycontrols.com

Cal-Bay Controls is the Southern California sales representative for Teledyne-API SO₂, NO/NO₂/NO_x, CO, CO₂, O₂, and O₃ gas analyzers, PM_{2.5} and PM₁₀ particulate monitors, calibrators and zero-air generators. We have worked with a number of Tribal air monitoring groups to provide instruments for new air monitoring programs or as replacements for old equipment. We can also team with sample system/integration companies, independent consultants and data management providers to provide a total air-monitoring solution. In addition, Cal-Bay Controls represents Charge Bliss, which provides energy management services, including: renewable microgrids separate from the local utility provider, solar energy, battery storage, smart controllers and automated software systems to reduce utility costs, produce clean energy, and provide critical backup power in case of power outages.

Lakes Environmental Software

www.webLakes.com

Lakes Environmental Software is internationally recognized for its technologically advanced environmental air quality modeling software and meteorological data products. Lakes Environmental Software is the developer of the Tribal Emission Inventory Software Solution (TEISS), which is used by hundreds of Tribes to calculate and report their annual emissions inventories. Stop by our exhibit to learn more about our software and data services as well as see a demonstration of our emissions management and air quality solution, AQMIS.

Thermo Fisher Scientific

www.thermofisher.com

Thermo Fisher Scientific Inc. is the world leader in serving science to enable our customers to make the world healthier, cleaner and safer. Gas and Particulate analyzers for your Environmental Ambient Air Quality Measurements.

Tribal Healthy Homes Network

www.thhnw.org

THHN is a clearing house for the AIRMATTERs tool kit, Technical Trainings and expert advice for indoor air quality and healthy home issues.

ARTISAN TABLES

Alexis Munoa Dyer Photography

<http://alexismunoadyer.squarespace.com>

Alexis Munoa Dyer is a film photographer from the Pechanga Band of Luiseño Indians. She photographs all things Indigenous including land, plants and people. She will be selling her fine art prints.
