

Radon Device Manufacturer Listing

Note: EPA no longer updates this information, but it may be useful as a reference or resource.

This list was collected and verified as part of a work assignment under U.S. EPA Contract #68D21085, Sanford Cohen & Associates, Inc., McLean, VA. This list represents a "snapshot" of the manufacturers at the time that the list was collected in **April 1998**. EPA does not intend to maintain this list; it is here for information purposes and as a historical document of the former EPA National Radon Proficiency Program. We apologize if any information on this list is now incorrect. For more information on current lists of radon device manufacturers, contact one or both of the [private National Radon Proficiency Programs](#).

Note: This list of radon measurement device manufacturers (presented in alphabetic order) does not represent any form of EPA assessment of the qualifications or accuracy of the devices listed, or implies that EPA or the U.S. government sanctions or endorses the services provided by these device manufacturers.
