

Webinar: Tribal Clean Transportation Round Table – Understanding and Addressing Range Anxiety

Hosted by the Institute for Tribal Environmental Professionals (ITEP), this interactive session is part of the Tribal Clean Transportation Round Table Series (held every two months) and is designed to engage tribal communities in a candid discussion about one of the biggest barriers to electric vehicle (EV) adoption: **range anxiety**.

What is range anxiety—and why does it matter to Tribes? These are just a few of the questions that will guide our conversation. This discussion-based webinar will feature insights from **Tim Clashin (Open Access Technology International)**, **Isaac Kinney (Blue Lake Rancheria)**, and **Peter Chipman (Native Sun Community Power Development)**, who will share their experiences and perspectives on overcoming challenges related to EV charging infrastructure in tribal communities.

This session is grounded in open dialogue, and **audience participation is strongly encouraged**. Bring your questions, ideas, and stories to help build collective knowledge around EV planning, charger installation, and transportation equity in Indian Country. Join us for a lively and solutions-focused round table as we navigate the future of tribal clean transportation and how to make EVs more accessible and practical for your community.

Date & Time:

- Monday, July 21st
- 8 am HST, 10 AM AKST, 11 AM PST, 12 pm MST, 1 pm CST, 2 pm EST
- 90-minute duration

Who Should Attend:

Tribal transportation planners, environmental professionals, energy managers, community leaders, and anyone interested in advancing clean transportation in tribal communities.
